

## "Who can I go to?"

**Most of you know that we have asked over the past year or so for input from professional airman regarding AME's they know to be advocate AME's. I wrote to each of them asking if they wished to be included in our referral list. Following are those that have responded. I would not hesitate to walk into the office of any one of these Doc's.**

**Keep the greasy side down.**

### **Doc & Carole**

This is a commercial licensed pilot AME who is doing about 150 physicals annually about half of which are for professionals with no errors last year. He will assist with Special Issuance and is also a HIMS medical sponsor. He intends to continue practice for another 10 – 15 years.

This is a Commercial licensed pilot (fly's a Scout) AME who is doing about 300 physicals annually – 60% 3<sup>rd</sup> class, 40% professionals with 2 errors last year. He is very much an advocate who will assist with your Special Issuance. See also Dr. Smith.

This is a licensed pilot AME who has been in the game since 1970 and intends to continue for another five years. - 4. Jenter, George W., DO - Sturgis, South Dakota** (605) 347 – 3684 –

I had the privilege of meeting this Doc when I was in OKC a couple of years ago. He is a fellow *Advanced Senior AME* – a rare designation indeed. He has been at it since 1973 and intends to continue indefinitely. He is doing about 150 physicals annually with no errors. 60% of those are for professionals. He is also a HIMS sponsor and that is equally rare. He is a licensed pilot and flies with a flying club. I know you would enjoy this AME.

- 5. Pinnell, Greg, MD - Saginaw, Michigan** (989) 793 – 6167

This AME did not share a lot of information. He states he has been an AME for 20 years and did 875 physicals last year with no errors. He states he will assist airman with their Special Issuance and is a licensed pilot who owns an airplane.

This AME has been in there since 1970's and intends to continue for another ten years. He is doing about 160 physicals annually with 90% being for professionals and had no errors last year. He is not a pilot himself. He sees airman Monday through Friday. He is located in the Twin Towers which has to be very cool! Perhaps even worth a trip to Malaysia!

- 7. Smith, Robert E., MD - Kettering, OH** (937) 396 – 1605

[www.chestmed.com](http://www.chestmed.com)

This is a fifteen year AME who has done about 60 physicals annually and last year became a Senior AME. 70% of those were for 3<sup>rd</sup> class, however, that is changing rapidly. He and Dr. Hornbeck (above) practice and fly together and look forward to growing the AME part of their

practice. No errors made by the way. He will actively assist with your Special Issuance and is a licensed pilot and aircraft owner (C210N). I took Carole to see this Doc with her recent serious bout of pneumonia – I trust him that much.
